

# CampusConnect — App Documentation

## User Research

---

### USER RESEARCH — COLLEGE STUDENTS (N = 22 INTERVIEWS)

---

Primary pain point

**76%**

struggle tracking attendance & deadlines across scattered sources

Decision driver

**71%**

just want today's schedule visible in one glance, no digging

Session length

**1.8m**

avg time from open to checking today's classes

Daily return rate

**84%**

open app daily just to check attendance %

### KEY INSIGHTS

---

- Students obsessively track attendance % to stay above the 75% eligibility cutoff
- Assignment deadlines are missed because reminders live across WhatsApp, notice boards, and email
- Timetable changes (room/time shifts) reach students late or not at all
- College announcements get buried under personal chat notifications
- Students want one login, not five separate portals/apps for academic info
- Dark mode usage: most students keep phone dark mode on permanently

#### HMW Statement

How might we help college students track their classes, attendance, and deadlines in one place — with zero missed notices?

## User Personas

---

## USER PERSONAS

AN

### Anu, 20

2nd Year B.Tech CSE, Chennai

Organized Attendance-anxious Daily user

Wants attendance % and today's timetable visible the moment she opens the app

Frustrated when she misses an assignment deadline buried in a WhatsApp group

RK

### Rahul, 19

1st Year B.Com, Bangalore

New to college Forgetful

Needs simple reminders — doesn't yet know which notice boards or apps to check

Overwhelmed by multiple separate college portals for fees, marks, and events

SM

### Sara, 22

Final Year, Placement-focused, Pune

Busy Event-driven

Tracks placement drive announcements and event dates closely

Wants push notifications instead of manually checking for updates

## User Flow

### PRIMARY USER FLOW — CHECKING TODAY'S SCHEDULE

## Wireframes

## LO-FI WIREFRAMES — KEY SCREENS

---

1 — Login

2 — Dashboard

3 — Attendance

4 — Assignments

5 — Profile

## Design Thinking

---

## DESIGN THINKING PROCESS

### 1 — Empathise

22 student interviews across 3 colleges, plus review of existing college portals. Found students treat academic apps as anxiety sources (missed deadlines, attendance drop) rather than useful tools.

Interviews Portal audit

### 2 — Define

Synthesised into three problem themes: Information scatter, Deadline blindness, and Notification overload from irrelevant channels.

Affinity map HMW statement

### 3 — Ideate

Brainstormed 40+ concepts, dot-voted to 5. Key bets: single dashboard for today's classes, live attendance %, and unified notifications.

Brainstorm Dot voting

### 4 — Prototype

Paper sketches → these lo-fi wireframes → next stage is an interactive Figma prototype. Prioritised 5 core screens covering the daily-use happy path.

Paper sketch Lo-fi wireframe

### 5 — Test (planned)

5-student usability test targeting a sub-2-minute "check today's schedule" task. Task completion rate and SUS score as KPIs.

Usability test SUS score

### Design Decisions

Dashboard leads with today's classes, not a generic home feed. Attendance % surfaced prominently, not buried in a menu. Assignments include an inline reminder CTA.

Dashboard-first Attendance UX
